1. Description

1.1 Overview

In practice, the working environment of the equipment may not be as good as expected, on the contrary, it may be very tough. For example, in the industrial environment, the site may have tremendous vibration, noise, dust, high temperature, and other issues. In the city environment, sunshine and rain, low temperature in winter and high temperature in summer are always unavoidable.

HT-M02 considers and solves all the above problems and design strictly with industrial standards, Integrated Linux Operating System (4.19 Kernel, Debian Stretch 10). IP66 waterproofing, no fan or motor heat dissipation structure, ROCKCHIP Quad-core Cortex-A55 64-bit 1.8GHz processor, 2G DDR4 RAM, 32G eMMC 5.1 ROM, support Micro TF card expansion. Support DC power supply and PoE power supply, support 4G (Cat. 1\Cat. 4), Wi-Fi (2.4GHz). it is convenient for users to apply in different scenarios.

HT-M02_V2 are available in the following product variants:

The standard mode has the basic function of LoRa and ETH connection (12V DC adaptor included), the customized functions are available to select one or more features according to your needs.
